EXPERIENCE

ARCOAI | Co-founder | 2026 - Present

- Co-founded a business automation and AI orchestration studio with Bairas Azamatov.
- Co-created arcoai.info in Uzbek, Russian and English, presenting services, project case studies and a Telegram-connected inquiry flow.

Pro Research | Product Manager | 2026 - Present

- Build business automations, demo projects and working AI-assisted prototypes to turn business needs into concrete product concepts.

FemFlow | Business Analyst / Product Manager | Past engagement

- Owned product specifications, information architecture and a Material You-based adaptive UI; contributed to Supabase backend architecture and sub-agent prompt orchestration.

Sammy Soft | AI Integrator | 2023 - 2024

- Fine-tuned Whisper for Uzbek speech recognition and built production speech-to-text, text-to-speech and LLM integration pipelines.
- Led a cloud-to-on-premises infrastructure migration.

SELECTED PROJECTS

Hoolee | Creator | hoolee.uz | 2026

- Created a gamified QA learning website set in a virtual office, with practical testing assignments, AI-assisted review and moderator oversight.
- Structured the learning experience around three projects and 21 levels, progressing from intern to junior QA through test cases, checklists and bug reports.

Sai | AI Product Workspace

- Built a visual workspace with development, feature and business knowledge trees, node-level AI chat and bring-your-own-key support using Next.js, React Flow and tRPC.

Mind Map | Visual Planning Application

- Built an architecture canvas and status board with typed nodes, labeled connections, grouping, undo, automatic layout and JSON, Markdown and PNG exports.

EDUCATION

School 21 UZ / 42 Network | Data Science studies | 2024 - Present

Peer-to-peer programming education; machine learning coursework and Coursera Data Science study.

SKILLS

Engineering: Python, TypeScript, JavaScript, React, Next.js, FastAPI, SQL, PostgreSQL, Supabase.

AI / ML: Whisper, STT/TTS, LLM integration, DeepSeek, scikit-learn, AI agent orchestration.

Product & delivery: Product specifications, business automation, prototyping, Figma, Git, Docker.
